 - Contract Operations - 2.2 million sq. ft.
 - 3PL Operations - 2.4 million sq. ft.
- 28.5 million cu. ft. of refrigerated space
- Specializes in food-grade logistics solutions

Built on Providing Value

WOW Logistics delivers integrated supply chain solutions in three core business areas:

Operations

Corporate/Consulting
Services

Third-Party Logistics
(3PL)

Contract Operations

Managed Warehouse Services
(MWS)

Transportation

Real Estate Development and Infrastructure Financing

Design Build

Construction

Infrastructure
Financing

Commodity Purchasing

WOW COMMODITY
PURCHASE PROGRAM®
(CPP)

Operations

Third-Party Logistics (3PL)

Many companies choose to outsource storage due to lack of expertise and resources to efficiently manage their own warehouse facility. WOW Logistics is an industry-leading food-grade storage provider—we're the only 3PL in the U.S. that is ASI audited at the food processor level and we consistently score above 90 percent. Our top-tier logistics technology and commitment to food safety make us an ideal partner for companies seeking ambient, refrigerated, and freezer warehousing solutions.

Contract Operations

Often, companies require dedicated space, equipment, technology, and personnel to manage their inventory. Without expertise in logistics and engineering, this can be a challenge for companies to manage in-house. Contract operations allow companies to outsource their warehousing needs with a guarantee of the space and resources required to run their operation efficiently.

Managed Warehouse Services

Managing a 3PL network is complex and time-consuming. Through our Managed Warehouse Services program, WOW will locate qualified warehousing providers in ideal locations, verify their insurance coverage, and facilitate the operational requirements for the customer. We streamline billing by providing one invoice for all operations. This eliminates the need for internal resources to manage 3PL relationships and drives efficiency.

Operations Cont.

Transportation

WOW Logistics provides non-asset-based transportation brokerage services. Through our carrier partners, we have access to a wide variety of modes and specialized equipment, which means better lane coverage for our customers. We also offer a fully outsourced managed transportation service where we act as our customers' transportation department—overseeing everything from lane procurement to billing. We manage our transportation business using an industry-leading TMS, which allows us to operate with greater efficiency.

Consulting Services

As a value-added service, we offer supply chain consulting. We analyze our clients' operations, uncover inefficiencies, and provide a roadmap of improvements that produce the highest ROI.

Real Estate Development

Build-to-Lease

Companies in need of a storage facility often lack the internal expertise to design, engineer, and construct the building in an efficient and cost-effective manner. A lack of supply chain knowledge, including product flow optimization, racking configurations, and material handling equipment needs present additional challenges.

WOW Logistics utilizes its 40+ year history in building ambient, refrigerated, and light manufacturing warehouses to design and construct facilities in locations that make sense for our customers. We also finance the project, so companies can lease a facility on a long-term basis and avoid the upfront expense that comes with a building project.

BETTER by DESIGN

Commodity Purchasing

WOW COMMODITY PURCHASE PROGRAM®

Companies often have raw material inventory that requires extended time in storage before it can be converted into finished goods. By carrying the cost of this inventory, companies tie up large amounts of capital for long periods of time—capital that could otherwise be reallocated to fuel growth.

Through our WOW COMMODITY PURCHASE PROGRAM, we provide a simple and more flexible alternative to traditional loans and asset-based lines of credit, so companies can invest money in their business that would otherwise be tied up in inventory.

Superior Facilities

- WOW Logistics' distribution centers are without peer. We are **experts in food product storage**. Among the ways we maintain a leadership position are:

- The only third-party logistics company in U.S. with facilities **ASI audited at the food processor level**, with scores consistently above 90%

- Each facility has a written Hazard Analysis and Critical Control Point (**HACCP**) plan

Facts and Figures

- Annually, we store and handle:
 - 2.2 billion lbs. of cheese
 - 1.3 billion lbs. of dry dairy products
 - 182 million lbs. of paper products
- Other noteworthy facts:
 - Through our WOW COMMODITY PURCHASE PROGRAM[®], WOW Logistics has purchased more than \$483 million in inventory in the last year.
 - WOW Logistics covers 1,032 different transportation lanes in the US and Canada
