

Check the health of your **supply chain**

- ✓ Quality Benchmarking Data
- ✓ Reduced Overtime Costs
- ✓ Lower Transportation Costs

CHALLENGE

A supply chain is a complicated entity, and requires regular check-ups on its many moving parts in order to maintain efficiency.

Unfortunately, when logistics isn't a company's core competency, regular efficiency checks can be neglected due to lack of time, necessary expertise, and analytical tools.

WOW SOLUTION

WOW's supply chain consultants will conduct an in-depth evaluation of your company's supply chain including: warehousing and distribution, transportation management, customer order fulfillment, and logistics technology. In doing this, they'll identify areas of improvement, such as space utilization, racking configurations, and metrics reporting. Then, they'll deliver effective solutions in areas where you need it most.

We do this through:

Expert Staff. Our engineering team is highly experienced in supply chain operations and project management.

Tools. WOW provides the analytical tools and processes to complete projects accurately and efficiently.

Consultative Approach. Our approach is focused on truly understanding our customers' needs and meeting their requirements.

Process Driven. WOW's method is centered on processes that drive efficiency and cost reductions, while balancing business requirements.

Implementation. Our recommended solutions are built for action. We'll provide a roadmap of solutions, and your predicted ROI, so you can identify which tasks to tackle in-house, and which to outsource.

Industry Connections. We can recommend excellent vendors in all areas, including IT solutions, material handling equipment, and carriers.
