

We make finding
warehouse space
look easy.

STORAGE SPACE is difficult to find in today's market, and a logistics manager's day is often dominated by checking availability and negotiating prices. In addition, logistics managers often don't have a network of storage providers outside of their day-to-day suppliers.

WOW Logistics has a large network of **PARTNER WAREHOUSES** in a variety of geographic locations. With our Managed Warehouse Service, we'll find you space quickly and at **COMPETITIVE RATES**.

Solutions from a team of **experts**

Managing a supply chain is complex – requiring a team of experts to operate efficiently and with minimal risk.

WOW Logistics Managed Warehouse Service gives you access to these professionals through a single point of contact.

- ✓ Warehouse legal liability
- ✓ Engineering
- ✓ Food safety
- ✓ Operations and handling
- ✓ Transportation
- ✓ Rate negotiations

FDA, FSMA, and SOPs

We are experts in the Food Safety Modernization Act (FSMA) and how it applies to outside warehouses and transportation carriers.

In addition to our stringent **Standard Operating Procedures (SOP)**, we've developed our own food safety manual. Our network of storage providers are trained using the same **safety and quality guidelines** as our own warehouses.

Protecting what's at risk

Accidents happen, and at some point your products could get lost, stolen, or damaged. Protection against this requires an understanding of:

- Insurance coverages
- Loss limits
- Product loss liability

With WOW Logistics **Managed Warehouse Services**, we'll use our expertise in third party warehousing to negotiate service agreements and leases, as well as loss limits and insurance coverages.

Don't overlook **transportation** costs

When companies find themselves in an overflow situation, they often don't have the tools to analyze the impact that a warehouse location has on their overall transportation costs.

With transportation being one of the highest costs in the supply chain, it's not something that should be overlooked. When our team finds storage space for your products, we have the ability to do an in-depth **transportation network analysis** – giving you the power to make the best economic decision.
